

Amendments to the Specification:

Please replace the paragraph beginning on page 10, line 2, with the following rewritten paragraph:

—The transition portion 307 of the connector 300 is preferably sufficiently narrow such that it may be bent by a surgeon to provide a better fit between the connector 300 and the femur 150. Optionally, as shown in ~~FIGURE 5~~ FIGURE 5A and FIGURE 5B, the inferior end 310 of the connector 300 may be bowed to conform with the anterior bow in the femur 150. The inferior end 310 may also be bowed in other directions to follow any other unique bows or rotations of the femur 150.—
